VIUSID Administration in MALARIA

Data obtained

CASE n°1

Patient ´s name	<i>Ahoe Koridou</i>
Age	<i>32 years old</i>
Sex	<i>fem.</i>
VIUSID : Side effects	<i>NONE</i>
Is the patient satisfied with the results ?	<i>YES, because her state of health has improved under VIUSID treatment.</i>
Would he/she take Viusid again in case of malaria ?	<i>YES</i>
Doctor ´s conclusions and comments :	<p><i>The above mentioned patient was treated with VIUSID as a monotherapy; her state was characterised by a high fever. Four days later, the patient was checked again and her state of health showed clear improvement. According to her, fever disappeared on the 2nd day of treatment. She was asked to come again 5 days later, when the medical check-up showed that her health was normal. Besides, she told us that as a result of treatment her appetite increased a lot.</i></p> <p><i>CONCLUSION : VIUSID has antiplasmodic effects upon the patient.</i></p>
Date	<i>18-01-2005</i>

CASE n°2

Patient´ s name	<i>Kakou Nina Estene</i>
Age	<i>29 years old</i>
Sex	<i>fem.</i>
VIUSID : Side effects	<i>None</i>
Is the patient satisfied with the results ?	<i>YES, because the symptoms of malaria disappeared on the next day after the beginning of VIUSID administration.</i>
Would he/she take Viusid again in case of malaria ?	<i>YES</i>
Doctor´ s conclusions and comments :	<i>VIUSID has effective antiplasmodic action and as a consequence alleviated the patient quickly bringing about a rapid disappearance of such symptoms as fever , headache, asthenia etc.</i>
Date	<i>25.02/2005</i>

CASE n°3

Patient ´s name	<i>Tekpo Opoupo Martin</i>
Age	<i>37 years old</i>
Sex	<i>masc.</i>
VIUSID : Side effects	<i>None</i>
Is the patient satisfied with the results ?	<i>YES, as the product relieves effectively the symptoms</i>
Would he/she take Viusid again in case of malaria ?	<i>YES</i>
Doctor ´s conclusions and comments :	<i>Resides its characteristics as a dietary supplement, VIUSID is very likely to have antiplasmodic effects to be explored.</i>
Date	<i>01.03.2005</i>

CASE n°4

Patient ´s name	<i>Kouamé Konan Michel</i>
Age	<i>31 years old</i>
Sex	<i>masc.</i>
VIUSID : Side effects	<i>NONE</i>
Is the patient satisfied with the results ?	<i>NO. On the 5th day after the last intake of Viusid, symptoms of relapse were observed</i>
Would he/she take Viusid again in case of malaria ?	<i>NO, as the first treatment didn´t relieve the symptoms</i>
Doctor´s conclusions and comments :	<p><i>The patient was treated with VIUSID during 3 days, with the dosage as recommended.</i></p> <p><i>In the very beginning, there was a substantial improvement (approx. on the 2nd day of treatment).</i></p> <p><i>On the contrary, during the following 5 days of treatment we observed a relapse of fever which reached 38,7°C. This fact compelled us to make Widal & Félix serological analysis which proved negative.</i></p> <p><i>CONCLUSION : we are facing 2 questions :</i></p> <ul style="list-style-type: none">- <i>is it a relapse ?</i>- <i>does the reason consist in an insufficient period of treatment ?</i>
Date	<i>16-03-2005</i>

CASE n°5

Patient ´s name	<i>Blé Marcelline</i>
Age	<i>37 years old</i>
Sex	<i>fem.</i>
VIUSID : Side effects	<i>NONE</i>
Is the patient satisfied with the results ?	<i>YES, because the patient felt relief thanks to VIUSID treatment.</i>
Would he/she take Viusid again in case of malaria ?	<i>YES</i>
Doctor´s conclusions and comments :	<i>We have submitted the above mentioned patient to VIUSID treatment used as monotherapy, due to a high fever. On the 4th day after the beginning of the treatment a remarkable improvement was observed in her state of health. As the patient said, fever disappeared on the next day after the first intake of the product. When the patient was checked again 5 days later, we saw that she had completely recovered her normal state of health. VIUSID has antiplasmodic effects.</i>
Date	<i>18-01-2005</i>

CASE n°6

Patient ´s name	<i>Sacko Saliou</i>
Age	<i>4 years old</i>
Sex	<i>masc.</i>
VIUSID : Side effects	<i>NONE</i>
Is the patient satisfied with the results ?	<i>The patient was administered 3 sachets/day of VIUSID during 3 days. YES, since the patient was relieved thanks to the administration of Viusid.</i>
Would he/she take Viusid again in case of malaria ?	<i>YES. The patient ´s health condition improved in general by the 4th day of Viusid administration. The product has a pleasant taste.</i>
Doctor ´s conclusions and comments :	<i>VIUSID is easy to administer, it has a pleasant taste. Flexibility in dosage.</i>
Date	<i>18-03-2005</i>

CASE n°7

Patient 's name	<i>Messou Jacques</i>
Age	<i>7 years old</i>
Sex	<i>masc.</i>
VIUSID : Side effects	<i>Yes. There was a moderate systemic nausea observed during the treatment.</i>
Is the patient satisfied with the results ?	<i>VIUSID : 3 sachets / day were administered during 3 days. Satisfactory results. The patient is satisfied. The patient was completely cured, although he felt some discomfort due to the nausea.</i>
Would he/she take Viusid again in case of malaria ?	<i>Yes, but in combination with some other product against nausea.</i>
Doctor's conclusions and comments :	<i>Treatment with VIUSID has given good results in general, especially lowering fever. The patient was completely cured; the only inconvenience was nausea attributed to the product's administration. In any case, it is necessary that the product taste pleasantly.</i>
Date	<i>18-03-2005</i>

CASE n°8

Patient ´s name	<i>Amerthur Priscilla</i>
Age	<i>14 years old</i>
Sex	<i>fem.</i>
VIUSID : Side effects	<i>3 sachets/ day were administered during 3 days. NO SIDE EFFECTS.</i>
Is the patient satisfied with the results ?	<i>Yes, the patient is satisfied. The product ´s administration is easy and can be made under ambulatory conditions.</i>
Would he/she take Viusid again in case of malaria ?	<i>YES.</i>
Doctor ´s conclusions and comments :	<i>Treatment with VIUSID has given very good results. The product was administered to the patient under ambulatory conditions, there was no need for her to miss her studies. Its administration is very easy, tastes good. Fever dropped 6 hours after the intake of the product. No side effects were observed.</i>
